## EDUCATION

**Ho Chi Minh City University of Foreign Languages – Information Technology (HUFLIT)**

Bachelor of Software Engineering

2023 - 2027

CGPA: 3.4 / 4.0

## CORE COMPETENCIES

**CS Core:** Data Structures &

Algorithms, OOP, Design Patterns.

**Architecture & API:** System Design,

Microservices, RESTful API Design.

**Best Practices:** Refactoring,

Problem Solving, Critical Thinking.

## CERTIFICATES

2025 - Present

## EXPERIENCE

● Sep 2023 - Present **Software Engineering Student – Academic Projects**

### Academic Experience

- Developed desktop, mobile, and web applications using .NET and Spring Boot as part of academic coursework
- Designed and implemented RESTful APIs for user authentication and data management
- Applied MVC architecture and structured backend logic for maintainable systems
- Collaborated in team-based projects using Git for version control and code integration

● Jan 2024 - Present **Self-Directed Website Developer**

### Personal Development Experience

- Built full-stack web applications using Next.js, React.js, and MongoDB (MERN stack)
- Developed dynamic and responsive user interfaces using TypeScript and modern React patterns (hooks, component-based architecture)
- Integrated frontend with backend APIs, managing state, data fetching, and application flow
- Continuously improved code quality through refactoring and adopting best practices

---

## PROJECTS

---

Feb 2026 - Mar 2026

### AI-POWERED RESUME ANALYZER

**Role: Fullstack developer**

**GitHub:** <https://github.com/Thanhbo209/ai-powered-resume-tracking>

**Tech Stack:** React Router v7, Tailwind CSS, Puter.js (Cloud Infrastructure), OpenAI/NLP API.

**Key Features:**

- Developed a full-stack system using Puter.js to store resumes and compare them with Job Descriptions and its company name.
- Created a scoring system to rate resumes based on ATS compatibility, keywords, and structure.
- Used OpenAI/NLP to find missing skills and give suggestions to improve the resume.

Jan 2026 - March 2026

### PERSONAL PORTFOLIO

**Role: Fullstack developer**

**GitHub:** <https://github.com/Thanhbo209/portfolio>

**Tech Stack:** Next.js, TypeScript, Tailwind CSS, MongoDB.

**Key Features:**

- Built a drawing tool using Canvas API so users can draw directly on the website.
- Used Next.js Route Handlers and MongoDB to fetch and store project data.
- Optimized images and media for faster loading and better SEO.

March 2026 - April 2026

### GROCERY E-COMMERCE PLATFORM

**Role: Fullstack developer**

**Github:** <https://github.com/Thanhbo209/grocery-ecommerce>

**Tech Stack:** React, TypeScript, Node.js, MongoDB, Tailwind CSS, ShadcnUI.

**Key Features:**

- Built a secure authentication & authorization system using JWT and Bcryptjs for both users and admins.
- Added Pagination and Filtering for products to make the website run faster.
- Admin page that manage products, categories, payments,...
